

## Free Amanita Newsletter 9/12/2018: Inflation, oil & energy crisis Prophecies #7: palm leaf readings

*I am the way and the truth and the life.  
No one comes to the Father except through me. (John 14:6)*

### 1. Amanita performance

The US rating agency *Timer Digest* monitors the performance of the leading 100+ market letters around the globe (publishing interval: every 3 weeks). In 2018 Amanita Market Forecasting is blessed with an extra-ordinary success ([Link](#)), with permanent top rankings in the 3 markets monitored: gold, US trashes & S&P 500 (this index is no longer part of the Amanita system). The Amanita orchestra is based on research of 40+ markets & only makes sense as a whole, as everything is well-orchestrated.

- 8/27/18: #1 Gold 12-month-performance ([Link](#)), #9 S&P 500 3-month-performance ([Link](#)), #5 bonds 12-month-performance ([Link](#))
- 8/6/18: #1 gold 12-month-performance ([Link](#)), #6 S&P 3-month-performance ([Link](#)), #2 S&P 500 6-month-performance ([Link](#))
- 7/16/18: #5 bonds 12-month-performance ([Link](#)), #6 S&P 3-month-performance ([Link](#)), #2 S&P 500 6-monthPerformance ([Link](#))
- 6/25/18: #4 Gold 12-month-performance ([Link](#)), #5 S&P 500 6-month-performance ([Link](#)), #5 S&P 500 3-month-performance ([Link](#)), #5 bonds 12-month-performance ([Link](#))
- 6/4/18: #5 gold 12-month performance ([Link](#)), #9 S&P 500 12-month performance ([Link](#)), #6 S&P 500 3-month performance ([Link](#))
- 5/14/18: #10 S&P 500 3-month performance ([Link](#))
- 4/23/18: #4 gold 12-month-performance ([Link](#)), #5 stocks 3-month-performance ([Link](#))
- 3/13/18: #5 bonds 12-month-performance ([Link](#)), #7 stocks 3-month-performance ([Link](#))
- 2/19/18: #4 bonds 12-month-performance ([Link](#))
- 1/15/18: #3 bonds 12-month-performance ([Link](#))

In the year 2016 I began to sell the Turkish lira TRY SHORT in the premium area, which has delivered monster profits of about 150% (without leverage), most of it in the past months. The timing came from the prophecies: in fall 2016 the first of the 7 seals of the apocalypse was opened (until 2016 TRY was pretty stable). Turkey has been prominent in the end times prophecies for 800+ years, as anticipated this is coming to pass now. And in March/ April 2018 the premium content stated that Italy (also a key player in the end times) is the *'next shoe to drop'*, which has been perfectly fulfilled since May 2018. The Amanita approach is unique on many levels in this corner of the galaxy, e.g. the very precise & reliable geostrategic total perspective. In this context the boss feels generous! ☺

### 2. Free market commentary: inflation, oil & energy crisis

On 9/11/18 with Rosh Hashanah (Jewish New Year) the third, black horseman of the apocalypse begins, with far-reaching economic & financial consequences. This horseman is the first with a clear economic message: beginning of inflation/ oil crisis & food crisis. As always, in this article I forge a huge bridge & connect the dots in a way hardly ever done before.

### 3. Prophecies #7: palm leaf readings

In the free newsletter from January 2018 I described my ongoing research project based on palm leaves for individuals, to find commonalities for the coming 30 years. In previous times you had to

travel to India for a reading of your palm leaf (unless you happen to live in India), but for some time remote readings over the internet have been offered, e.g. by [palmleaves.eu](http://palmleaves.eu). I thank all who had their palm leaves read & shared some excerpts of their readings with me. So far the analysis of 3 dozen people has revealed an amazing alignment regarding world events, which I will discuss in this article.

I thank you so much for your continued interest & bless you from the bottom of my heart!

Yours,

Manfred Zimmer

Amanita Market Forecasting <http://www.amanita.at>

1190 Vienna, Austria - European Union

**Content free Amanita newsletter:** The free Amanita newsletter is sent out every 2-6 months, it complements the Amanita premium subscription, which is published 1-5 times per month (target: 30-50 premium updates per year). The free market commentary is only considered to be a commentary on the financial markets. Financial forecasts in the narrow sense of the word are only offered in the premium market letter. Note that the Amanita system is optimized for smart instruments (futures, FOREX, crypto-currencies – perhaps also CFDs). The Amanita system is based on a high degree of diversification in 5 markets (currencies, agriculture, precious metals, energy & bonds – all stock index signals were discontinued in 2017) & only makes sense as a whole, because all positions are well-orchestrated & therefore isolated positions \*never\* makes sense. For these 2 reasons (professional instruments & diversification) a replication only works for larger portfolios with at least EUR 300,000/ USD 350,000, as well as for institutions (among the premium subscribers there are fund managers managing billions of euros or dollars). Because the Amanita premium market letter is very different from every other market service on the planet, you should be prepared for at least 3-6 months to get acquainted with the Amanita system. That's why the shortest subscription period is 6 months & trial subscriptions are no longer offered. Personal services had to be discontinued in 2008 because waiting times rose to one year.

Premium subscription order page: <http://www.amanita.at/en/market-letter/price-list-order-form-premium-subscription>

FAQ: <http://www.amanita.at/en/faq-eng> For further technical or administrative questions please contact my assistant Peter Ressmann [support@amanita.at](mailto:support@amanita.at).

**Disclaimer:** All information and forecasts provided here have been researched to the best of my knowledge but are by no means a solicitation to buy or sell stocks or other securities. I do not guarantee the accuracy, adequacy, or completeness of any information and I am not responsible for any errors or omissions. Past performance does not guarantee future performance. ## Free market commentary: inflation, oil & energy crisis

On 9/11/18 with Rosh Hashanah (Jewish New Year) the third, black horseman of the apocalypse begins, with far-reaching economic & financial consequences. This horseman is the first with a clear economic message: beginning of inflation/ oil crisis & food crisis. As always, in this article I forge a huge bridge & connect the dots in a way hardly ever done before.

*"The other three have left to join  
a major corporate raider."*

### Oil price & inflation

According to the pastors *Derek Prince* ([Link](#)), *David Reagan* ([Link](#)) & others, between  $\frac{1}{4}$  &  $\frac{1}{3}$  of the Holy Bible is prophecy, thereof 80-95% has already been fulfilled, with the rest fulfilled before the mid-21<sup>st</sup> century. The message of the 7 Seals & 7 Last Trump(et)s & 7 Vials of Wrath unfolds year after year in the 21 years from fall 2016 to fall 2037. A seal opening means that new, so far hidden information is revealed. Note that the first 4 seals of the apocalypse are identical with the 4 horsemen (1. white 2. red 3. black 4. green), which are opening issues that will coin our world until the middle of the 21<sup>st</sup> century. Right now we open the 3<sup>rd</sup> seal/ horseman (Revelation 6/ 5-6):

*When the Lamb opened the third seal, I heard the third living creature say, "Come!" I looked, and there before me was a black horse! Its rider was holding a pair of scales in his hand [to weigh money -> inflation]. Then I heard what sounded like a voice among the 4 living creatures, saying, "2 pounds of wheat for a denar/ day's wages, and 6 pounds of barley for a denar/ day's wages, and do not damage the oil and the wine!"*

So we see multiple hints suggesting inflation. Interestingly, oil is mentioned, which can be immediately realized as the Biblical code for \*the\* by far most important inflation market. Oil has a higher trading volume than \*all\* other commodities combined, i.e. a major inflation is unthinkable without the participation of oil. The Revelation contains a great many codes that nobody understood 2 millennia ago, but now in the end times it suddenly makes sense. In the old times many wars were fought because of gold & silver, but since the 20<sup>th</sup> century the martial focus has shifted to oil. The sentence, "*do not damage the oil*" obviously refers to the Middle East wars, the #1 oil producing region.

Within 1 trading day (!) of the oil bear market low on January 20<sup>th</sup>/ 21<sup>st</sup>, 2016 at \$26/ WTI I called the end of the oil bear market & gave a perfect LONG signal (see the list of the extra-ordinary Amanita calls on <https://www.amanita.at/en/market-letter/performance-english/1-extra-ordinary-amanita-calls-since-1999>). Moreover I warned in early 2016 that from now on oil SHORTs are strictly forbidden for many years because of the underlying super-bullish trend. Indeed, since early 2016 all CL corrections have been short-lived in this +200% monster bull market to date. The most fundamental market rule is, „*The trend is your friend.*“ However, so many trader sheeple consider themselves smarty-pants & position themselves against the higher trend. Foolish philosophies like

positive thinking even worsen the problem of their hubris. Nothing is a better demonstration of the ongoing inflation than the new record market capitalizations of individual companies: from \$1 million in 1781 to \$1 trillion in 2018 (Apple), which is 6 zeros added ([Link](#)).

Chart of the Week

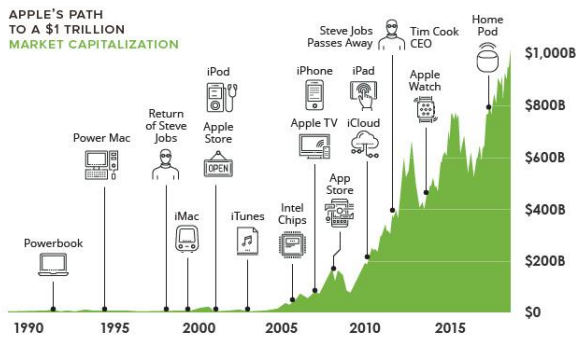

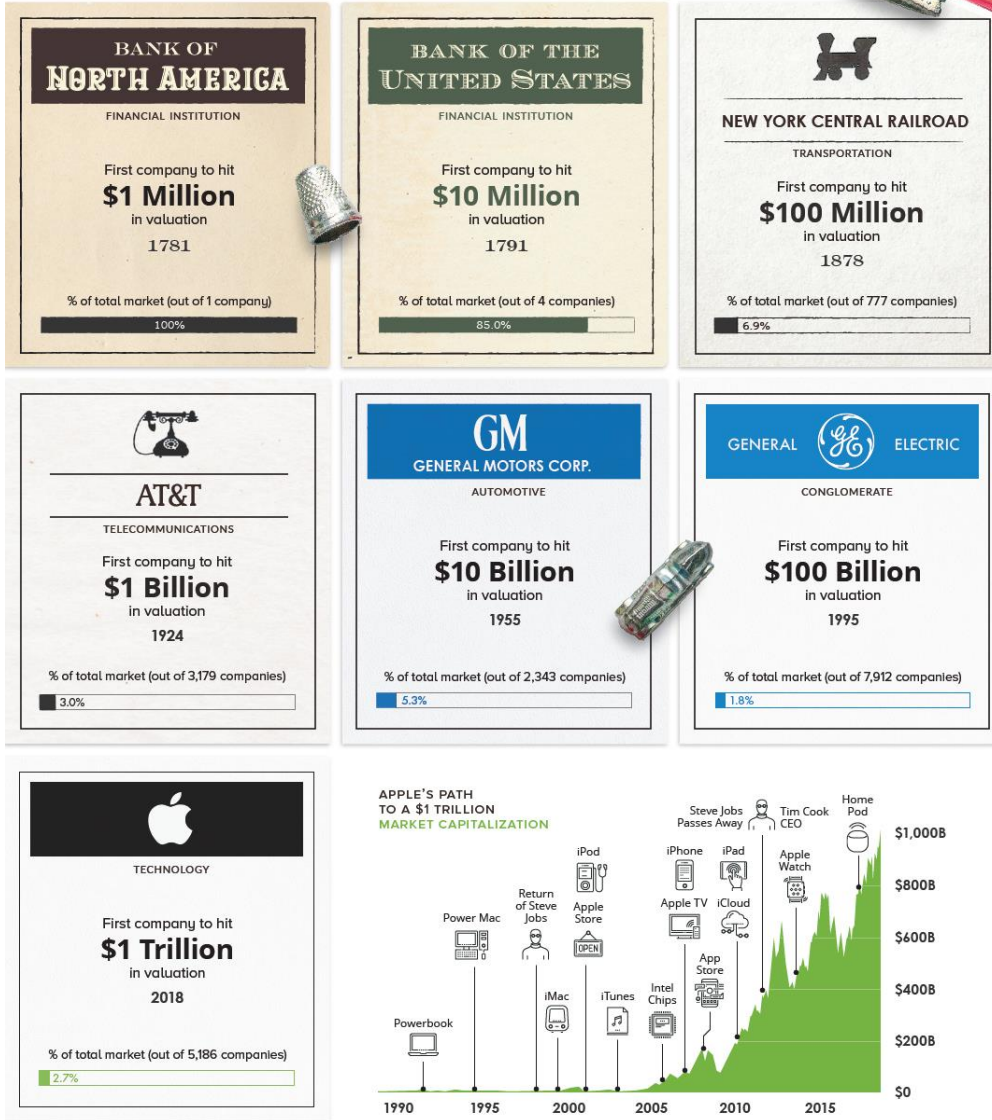

### MARKET CAP MILESTONES

Apple joins an elite club after hitting an astronomical \$1,000,000,000,000 valuation

In light of Apple's recent \$1 trillion valuation, we are looking back at previous market cap milestones in U.S. history.

From railroads to tech, each landmark remains highly descriptive of the business paradigm in each era.

## Gross & subtle energy crisis

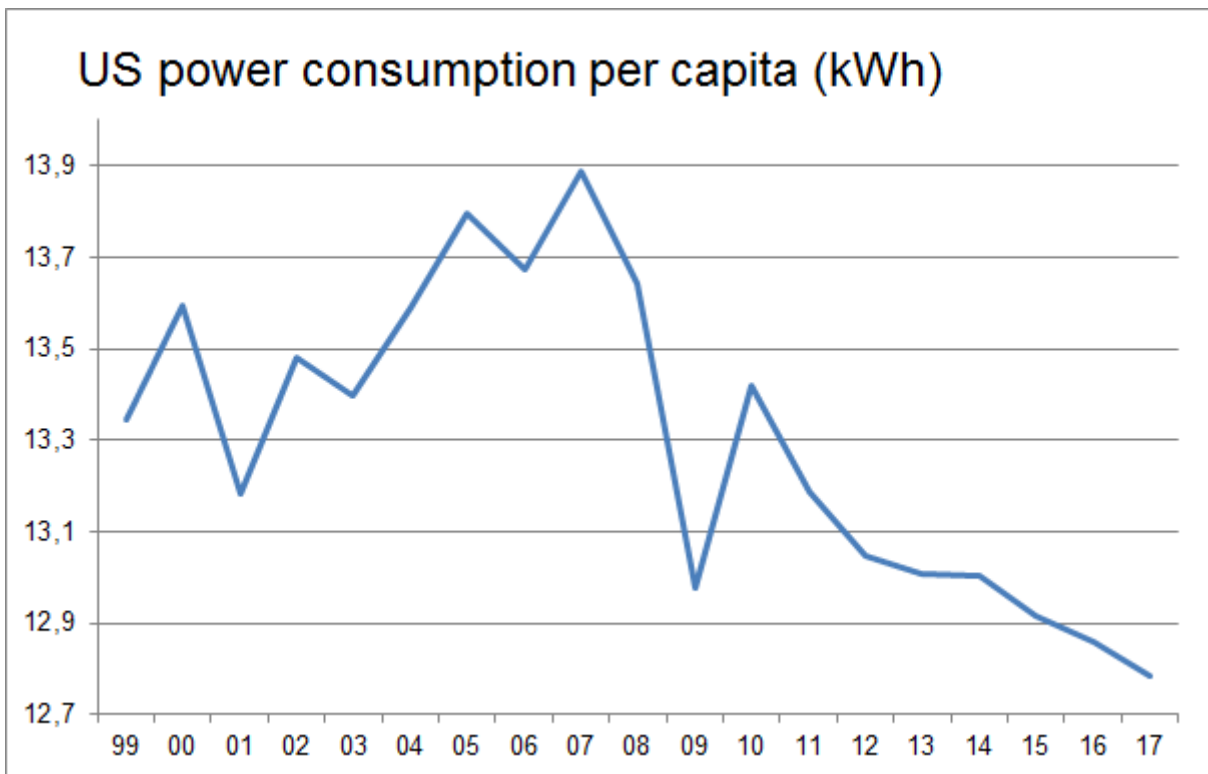

So the Holy Bible talks of a gross energy crisis, but what is the subtle background? It is the lack of subtle life energy as documented by many symptoms, 4 examples:

1. collapsing sperm count: Upon a lack of energy the body first tries to save energy in areas not needed for immediate survival, men with their tadpoles breeding. This is the most visible alarm sign, this topic was extensively discussed in January 2018 (<https://www.amanita.at/en/interesting/end-times-electrosmog?id=1686>). Less than 10% of the autochthonous men in Eunuchistan (= socialistic bloc EUSApn + adjuncts) still have enough energy to deliver top sperm (e.g. more than 40 million/ ml). Now in fall 2018 the average sperm count appears to have dropped to 8-9 million sperm cells per ml, again millions lower than 3 quarters ago. Technically, the sperm median count most likely is already in the infertile region, due to the ongoing decline of 2-3 million per year since the 1980s. Black is the opponent of sperm (white), so the black horseman September 2018-September 2019 will accelerate the crash of autochthonous conceptions, presumably by 10-30% in comparison with the year before. Under the green horseman of the apocalypse 2020 the terrible sperm bear market will get more severe again, so that in the early 2020s for most autochthonous men in Eunuchistan to produce a successful fertilization will be a kind of little miracle. In just a couple of decades we have lost 90% of the tadpoles, so the remaining percentage points will be lost in a quickie. A linear regression line of the sperm count crosses the zero line (=no sperm at all) in the early to mid-2020s, especially taking the accelerated downtrend) since 2013 into consideration. So far in most of Eunuchistan (with the main exception Japan) the ongoing birth crash of the autochthonous population is offset & concealed by the invading *Ishmaelite's* (offset of *Hagar*), who in Germany boast about 60% (!) more births in 2018 compared to 2014. The lack & dying of babies was already seen in 1980 by *Ken Peters* ([Link](#)). The lack & dying of babies was already seen by *Ken Peters* in 1980 ([Link](#)). According to the British statistician Prof. *David Spiegelhalter* will be sexless by 2030, due to the crash of sexual intercourse frequency ([Link](#)) – in Eunuchistan. This means we quickly approach the behavior of the reptilian ETs, who successfully manipulate us.  
The soul plan (8<sup>th</sup> dimension) of more than 99% of the people wants to have their own children, only some tenths of a percentage don't have it (determined by the 9<sup>th</sup> dimension & higher). However, the sperm crash 2017-24 can be fulfilled less & less, these people are declared open season: main soul reason for the coming biggest extinction wave in history.

2. energy consumption & economic depression: The lying press spreads 24/7 the narrative of eternal economic expansion, however nothing could be further from truth. In the US the power consumption per capita has been declining for 11 years (since 2007), oil consumption already for 13 years (2005). In Europe the situation is quite similar. Energy consumption & real GDP are tightly correlated, so these numbers leave no doubt that Eunuchistan has been in an economic contraction = depression for at least 11 years. One could also say that the energy sector has been in a crisis since 2007, due to the terribly long economic depression.

3. convenience: This symptom is most dramatic with today's children, which are subject of a 24/7 bodily harm through microwaves. As a sports instructor told me recently: in earlier times children were punished by not allowing them to access the fresh air, today punishment is to force them

to go out & exercise. Humans are animals in dire need of exercise & the lack of this natural drive is a sign of a deep underlying disease, one of them being the lack of energy.

4. silence, less laughter: In 2018 I had an interesting experience, when I went into a fully occupied restaurant, which was totally silent nevertheless, like a funeral. Just a few years ago such a non-existing noise would have been impossible (talking, laughing...). Suddenly I remember a life as a Middle East woman 3600 years ago, when I was killed during the last Nibiru return (around 1606 B.C. according to Roger Liebi Link). A quote from the Kolbrin Bible (chapter 6), which explains the background of the silence (Link):

*The dark days began with the last visitation of the Destroyer [Nibiru] and they were foretold by strange omens in the skies. All men were silent and went about with pale faces. [...] These were days of ominous calm, when the people waited for they knew not what. The presence of an unseen doom was felt, the hearts of men were stricken. Laughter was heard no more and grief and wailing sounded throughout the land. Even the voices of children were stilled and they did not play together, but stood silent.*

At conception a human gets a certain pre-natal energy reservoir, especially these 3: Jing, kidney essence & spleen substance/ healing chi. Normally you obtain energy through breathing, eating... so that you don't need to rely on the pre-natal energy. That's why usually the pre-natal energy is only consumed very slowly over a lifetime but when it is exhausted you die. However, today's energy use problem is that due to so much environmental stress (the strongest one being of course electrosmog) it is harder & harder to satisfy one's energy need by natural means.

That's why in Eunuchistan more & more people are living off their life energy battery. The key trigger of the switch to battery operation is often a deep life crisis or a serious disease such as cancer or burnout. During major crises like this you almost always depend on your pre-natal battery, which is its prime purpose. However, after the crisis one should return as soon as possible to the standard operational mode, which unfortunately happens less & less in the end times. People almost always assume that everything is as it was pre-crisis, however nothing could be further from truth.

Result: now in fall 2018 about 60% of the Eunuchistan population is living partly or fully battery-based, mostly men – with a permanently rising tendency. The socialistic bloc (=Eunuchistan) accounts for only 1.5 of the 7.5 billion world population, however, it is responsible for the biggest part of the global GDP. The other 6 billion people experience the same energetic deterioration, but with a delay of 5-10 years. Compare that with the year 2000 when only 5% of the Eunuchistan population was living consuming their life battery & even in 2013 it was only 8%. However, since the beginning of the 40 quarters of testing from 8/23/13 this number has been skyrocketing. You can only live exclusively on battery for 3-5 years, before it's empty. The red horseman of the apocalypse 9/23/17 – September 2018 (started on the very day of the Virgo constellation 9/23/17) marked the transition to the red danger zone of life battery. Under the 3<sup>rd</sup> (black) horseman September 2018-September 2019 life battery use will become more & more visible, finally under the 4<sup>th</sup> (green) horseman September 2019-September 2020 the extinction wave will begin into the late 2040s.

## Energy & information (truth/ lie): an unknown correlation

One important fact is never understood: lack of energy is the \*inevitable\* consequence of lies! Life energy is held in the 5<sup>th</sup> dimension, according to the unified field theory of *Burkhard Heim & Walter Dröscher* from the Austrian Patent Office (likely the biggest genius in the history of physics), while information held in the 6<sup>th</sup> dimension (ruled by Venus=6) determines energy. Reason: the higher dimensions define the lower dimensions. The muscle test of applied kinesiology (although it was already used long before, e.g. by Indians) is based on this principle: stress like wrong statements (=lies) weakens muscles, so lies steal energy.

Hence the muscle test only displays what is happening in every second in a human body anyway, when you are confronted with either truth (=Yang strengthens) or falsehood (=Yin weakens). In the 1970s this effect was accidentally discovered when it was observed that muscles are turned off when people are exposed to the lies of politicians, even when they were totally clueless regarding the content. In a nutshell, every lie is stress & energy theft for the system & cumulatively the pandemic of untruth \*must\* lead to a lack of energy. Average truth content 2018 in books, forums, blogs, lectures & videos:

- lying press (junk): 20-40% truth (regarding the important topics)
- new age literature: 30-50% truth
- financial market books: in the best case 50-60% truth, but usually lower

Truth is the male Yang aspect of god, and love the female Yin aspect. Since the 1968 Luciferian revolution the Yang has been totally smashed & today the Yin rules. This is why we suffer from lies as never before in the history of humanity. *Jesus Christ* warned us of many things, but most of all of deception, as preacher *Derek Prince* explains ([Link](#)).

I was a student of *Hawkins* for 42 quarters from spring 2002 until his death on 9/19/12, and I have done 30,000+ muscle tests since 2002. During the first 8 years as his student (more than 10,000 muscle tests) the results were not sufficient to be part of the Amanita system. In the first Amanita years after the formation in 2000 the Amanita truth content was only a 'normal' 50-60%, but rose only slowly to about 67% by 2010. Then percentages began to rise quickly from the opening of the 3<sup>rd</sup> eye triggered by the solar eclipse 7/10/10. Finally in 2014 the 90% level was surpassed, with the trend still slightly up. This leap was the result of having lost my core veil (6<sup>th</sup> dimension) on 11/4/13, followed by the installation of a truth line in my holy axis (spine with 23 spinal discs & ~33 vertebrae).

A truth content ~66.6% is crucial, because at a higher truth level the crowd turns away, due to disgust & doubt. That's why since 2012 I have received only one request only from the mass media, compared to dozens in the years before, see media page ([Link](#)). If you want people to trust you, then you have to present them truth & lies in the proper mixture. That's why the only way to get the confidence of the crowd is to tell them lies. There is an olfactoric way to detect the truth content: the truth has a lovely rose odor (as in the case of Marian apparition), while falsehood stinks ("I smell a rat").

However, the highest percentage points (truth level >90%) are a very tough challenge: careless mistakes/ slips of the pen, tiny details, terminology (based on concepts that might be erroneous)... Because of these reasons it is so much easier to achieve a truth content of >90% in written form, compared to verbal communication. That's why the video trend (YouTube) adds a lot to the ongoing truth level bear market.

Every human not only has a consciousness level LoC (0-1000) but also a truth level (0-100%). I made this discovery 5-10 years ago, after about 10,000 muscle tests. The repeating observation was that authors have approximately the same truth levels in their newsletters, with a variance of only +/- some percentage points. So the truth level of a person is a form of habit or preference comparable to what one considers as an adequate room temperature or an adequate sweetness in food & beverages. This is the level where one feels subjectively most comfortable, as both a too low or too high truth level lead to discomfort & are therefore avoided. People mostly (almost exclusively) quote sources that align with their truth level, which is an indirect quantification of the truth content.

The consciousness level LoC suggested by *Hawkins* & the truth level suggested by Zimmel correlate: the primary intersection is LoC 200 = truth level 50%. Under 200 falsehood & the negative (=Yin) dominate, above 200 truth & the positive (=Yang). Although the truth level of almost all with an LoC<200 is also <50%, more & more people calibrating at an LoC>200 also have a truth level of <50%, due to the 24/7 dissemination of propaganda by the lying press. In this sense the truth level is a leading indicator for the consciousness level.

Note that almost all people are weakened by falsehood, with the exception of those with a level of consciousness LoC>850 on the scale of *David Hawkins*, M.D., Ph.D. By the way, *Hawkins* was one of the three pioneers of orthomolecular medicine (the other two are the double Nobel Prize laureate *Linus Pauling* & *Abram Hoffer*). In 1973 *Hawkins* published the book *Orthomolecular Psychiatry* co-authored with *Pauling*. In the latter years of his life *Hawkins* surpassed the LoC=850 level, decades after his basic awakening (loss of core veil) on 1/10/1965. After taking out the 850 level his muscle testing arm no longer became weak upon false statements. So he always needed his wife *Suzanne* to muscle-test. 850+ means you are pretty much beyond duality (symbolized for instance by the Freemasonic chessboard). *John* 10:28-30 describes LoC>850 as follows: "I give them eternal life, and they shall never perish; no one will snatch them out of my hand. My Father, who has given them to me, is greater than all; no one can snatch them out of my Father's hand. I and the Father are one." There are 4 critical levels:

1. 600 - end of normal ego: 50% pass away during this transition, respectively the jump happens just after death because of the soul review.
2. 700 - enlightenment: from here on the level of consciousness remains almost always stable, the only known crash from this level was *Moxammed* from 740 to 130 at the age of 38 years, after black magic (curses) against him in the years 611/612 ([link](#)). From 623 on he began with his murders. 700 also is the current LoC of the later Emperor *Henry the Lucky*: this world ruler of the end times has been prophesized for at least 3000 years, including from remote places like Indonesia, according to *David Montaigne*.
3. 850 - final Luciferian test ([Link](#)): Here a popular illusion disappears, namely free will. Free \*human\* will requires a separateness from \*divine\* will, and at 850+ this gap is closed, so the spiritual will rule. Only the divine is free but not the human, even when false teachings such as new age, humanism & Freemasonry claim this is the case. Thus the LoC=850 equals the 11th dimension, according to the unified field theory of the German physicist *Burkhard Heim* the home of divine will. Since 2018 we work with divine choice points on the highest level of Vortex Healing®, which is the practical implementation of that. The symbol for the spiritual will

is the key of David (Revelation 3-7):

*To the angel of the church in Philadelphia write: these are the words of him who is holy and true, who holds the key of David. What he opens no one can shut, and what he shuts no one can open.*

The 850 test is discussed in *Matthew 4/1-10* (temptation in the desert), and *Hawkins* describes it as follows:

*"Once you've surrendered positionalities, you come to understand that you're no longer subject to personal karma, and the temptation arises to assume all power: "All power is yours; own it." I thought, Who the hell would want it? There's a you that was going to have the power. The power isn't with you, anyway. That which you are is the source of your own life. [...] On one occasion, there was no worldly presence, but on the consciousness level, there was an encounter with a more rarified Luciferic presence that promised great power if one went into agreement with it. When this was refused, it retreated. This occurred at what might be analogously referred to as a high-altitude fail/ pass test. One could see and know that Christ had passed through that temptation and had also refused it.*

#### 4. 975 - final door: final ego death -> avatar 985-1000 (only avatars access the 12<sup>th</sup> dimension)

Note that LoC=850 has only been achieved by 15-30 persons in the past 5000 years of the goddess *Kali*, three of them lived in a human body during summer 2018, as of the writing of this article ([Link](#)). 11-12 of them are known by name (*Abraham* is a borderline case): *Jesus Christ* 1000, *Buddha* 1000, *Amma* 1000 (living), *David Hawkins* 1000 (at the end of his life), high 900s man who is the Avatar of *Shiva* the destroyer (living), *Huang Po* 960, Apostle *John the Baptist* 930, *Moses* 910, *John* the Apostle (author of the Book of Revelation) 910, Apostle *Simon Petrus* 910, *Zarathustra* 860 (*Abraham* 850). An LoC of >985 means a person is an Avatar.

The reason for the male dominance is that for a woman the jump to 600+ is so much more difficult than for the man, due to her strong attachment to the body & love (LoC 500-599). Without doubt, the Yang is connected with heaven & the Yin with earth and thus hell realms deep down into the earth. The old snake *Sadhana* (Satan) is female & as the first transgender deceived everybody by appearing mostly male. That's why we read in the gospel of Thomas saying 114: "For every female who makes herself male will enter the kingdom of heaven." True divinity is even beyond love, as love is not more than an emanation from the divine, but not the divine itself. The Avatar *Amma* opened the door for women, there is reason why this domain is AM(M)Anita. There is a clear Yin-/Yang polarization of the levels of consciousness: 200s (courage) male, 300s (acceptance) female, 400s (intellect) male, 500s (love) female, 600s-900s male. You always have 2 spiritual paths: the path of the mind/ spirit (Yang) e.g. by *Ramana Maharshi* (*What am I?*) & the way of love & surrender (Yin) e.g. by *Amma*, the avatar of the divine mother.

Bottom line: the 'wellbeing' caused by lies is the \*subjective\* side, \*objectively\* only the truth sets you free & makes you strong & full of energy! However, never before in history have we seen so many lies as today, where the number of lies grows each year. So a collective energy crisis is inevitable when in late 2019 the mother of all lies (666 Antichrist) begins her reign for 42 months into 2023.

## Truth/ light & vitamin D

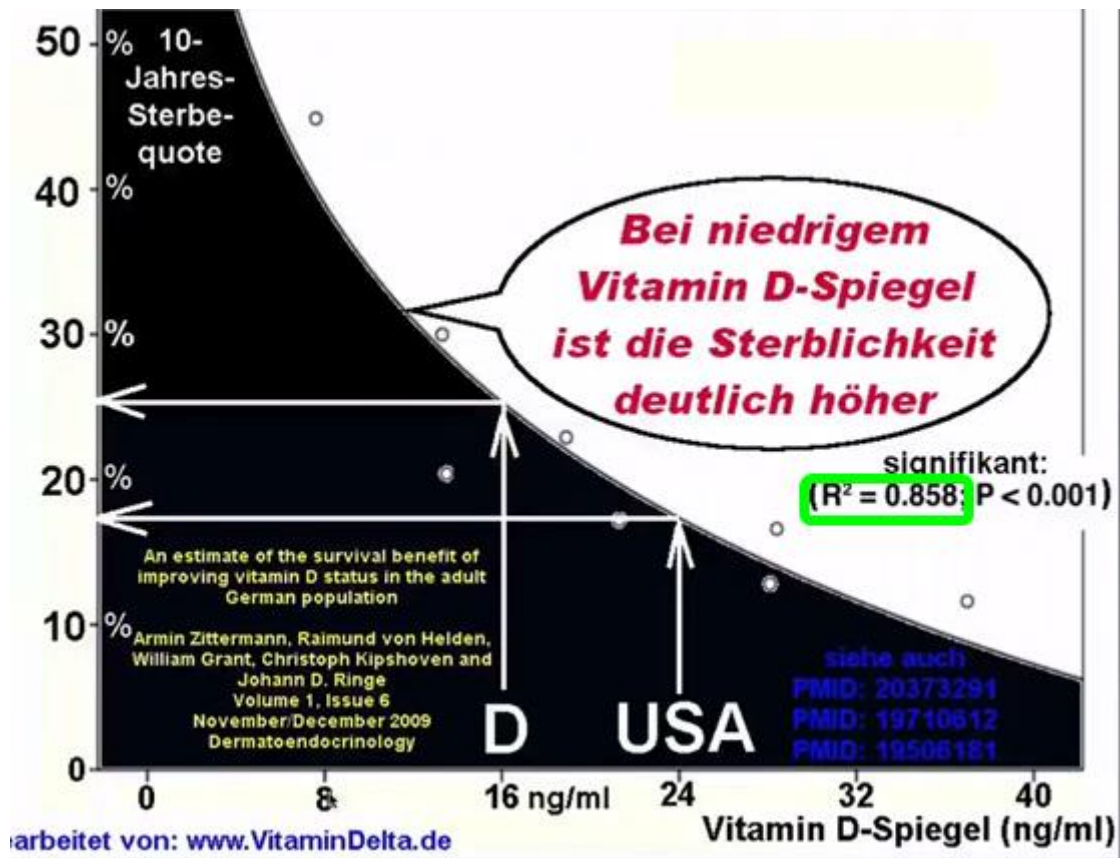

*For there is nothing hidden that will not be disclosed, and nothing concealed that will not be known or brought to light. (Lukas 8:17)*

Polarities:

1. Yang: light, truth, positive, independence/ freedom, sun, heat
2. Yin: darkness, veils=lies, negative, dependency/ bondage, moon, coldness

The truth is a reflection of the light principle & the corresponding master hormone is vitamin D, where most of Eunuchistan is in a very bad situation. Note that the light vitamin/ hormone was first synthesized in Göttingen (Germany), which contains the German word *Gott* = god: so the name analysis clearly demonstrates the connection to divine light. *Dr. med. Raimund von Helden* ([link](#))

quotes a study from the early 2000s, which indicates the 10-year mortality has an incredible correlation of  $r=93\%$  ( $r^2=0.858$ ) with measured levels of vitamin D (ng/ml). I bet the correlation would even rise further to  $r=95-97\%$  ( $r^2=0.90-0.95$ ), if 30-year mortality were used. However, extended longitudinal studies are very difficult from a practical point of view & therefore almost never conducted. Today (almost a decade after publication) the correlation is most likely again higher, approaching a near 100% correlation.

A further escalation looms when the light is turned off so-to-speak, under the third, black horseman of apocalypse during fall 2018-fall 2019. Because of the key role of the light hormone the lying press has been recommending since the 1980s not to go out around noon & be exposed to sunlight (when the bulk of vitamin D is formed, depending on the latitude). The lying press also recommends to apply poison (=chemical sun creams), instead of physical sun blockers. It is \*not\* the sun that causes skin cancer but these poisonous sun creams, especially when exposed to electrosmog. You are on the safe side as long as you do the opposite of what the lying press suggests. From my heart opening on 7/10/08 (level of consciousness LoC jumped to 500+) I was suddenly able to withstand 3-5 times longer sun exposure without getting sunburnt. Because of the heart opening the light body develops, with a variety of gross & subtle consequences, e.g. that you are able to withstand a lot more light.

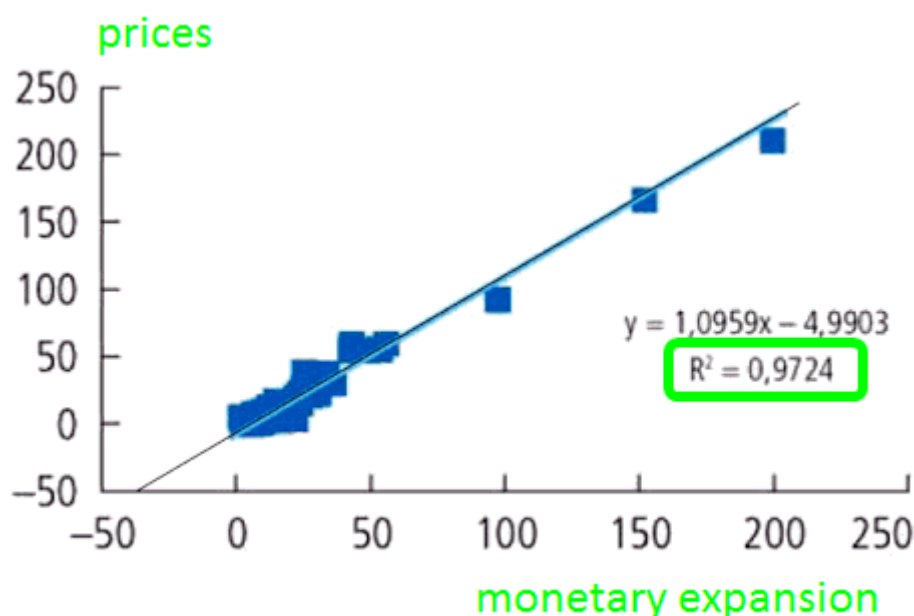

### The true nature of inflation: implicit Amanita inflation

*May their eyes be darkened so they cannot see, and their backs be bent forever. Pour out your wrath on them; let your fierce anger overtake them. [...] May they be blotted out of the book of life and not be listed with the righteous. (Psalm 69)*

The energy crisis topic (both personally & globally) is closely tied to the topics (hyper-) inflation, war & earth changes. Major wars & extreme earth changes will always trigger hyperinflations, even under a precious metals standard. E.g., the climate deterioration was a major cause behind the hyperinflation of the Roman Empire in the 3<sup>rd</sup> century. Above all, the coming earth changes (never seen before) open a new dimension, which are almost 100% neglected by conventional economics (apart from some BS publications on the economic effects of the alleged 'greenhouse effect').

The problem is that today's schools of economics are completely clueless when it comes to the true nature of inflation, including the Austrian school. It appears the Archontic deception ([link](#)) couldn't be more perfect... The monetary veils will be lifted in the 7 years 2016-23, as each year another seal of the apocalypse is opened. From September 2023 the financial system of the coming millennium (Golden Age) will be slowly established. It is my task to destroy the money hypnosis of the Greys from Orion & to reconnect our planet financially with the rest of our galaxy.

Every intelligent person today understands that true inflation is 2-3 times bigger than the official bogus numbers. This fact is only denied by academics, market sheeple & market gurus. The most absurd teaching on inflation comes from the cycle analyst Martin Armstrong (11/1/49). In all seriousness Armstrong claims that inflation has got nothing to do with money printing... According to a UBS study the correlation of monetary expansion & inflation is 'only' r=98.6% ([Link](#)). Only Armstrong's statements regarding earth changes are useful & what he developed at a younger age. As usual, in the crash phase of the life cycle (age >66.6 years) hardly more than pre-senile nonsense can be expected from analysts. Certainly a price had to be paid for surviving jail, Armstrong may continue his work as long as he brainwashes his readers 24/7: praising the US regime & the Rothschild central banks ([Link](#)), badmouthing Europe & the euro, warning of cryptos & predicting deflation ([Link](#)). With positions like that it is easy to see which brood of vipers he serves.

(Quelle: [UBS](#) Research)

The average lifetime of unbacked fiat money is only 38 years according to an analysis of 599 fiat systems ([link](#)). Meanwhile we are in the 48<sup>th</sup> year of this system (beginning 8/15/1971). 156 fiat systems ended in hyperinflation, with 165 were wiped out by wars. Alone 95 currencies didn't survive WW2, with 278 ended in a currency union. Obviously all monetary economists are stuck in their stone-age theories of the early 20<sup>th</sup> century, when almost no leverage & external effects did existed – which changed dramatically during the course of the 20<sup>th</sup> century. 4 examples:

1. The start of the incredible large external effects (also on the time-axis = postponed inflation) began after WW2 with the 'peaceful' use of nuclear power. Fukushima will boost global inflation a lot during the 21<sup>st</sup> century, at first with pronounced regional differences. The true cost of one kWh of nuclear electricity may be EUR or USD 10-20, 50-100 times higher than the official prices, for instance of EUR or USD 0.20.
2. A vaccination may only cost EUR or USD 10-20 in the eyes of the world (exoteric calculation), but in reality (esoteric calculation) the true cost may amount to more than EUR or USD 10,000, because of the terrible long-term health effects of vaccinations (not just for yourself, but also your offspring). In other words, true costs (future inflation) may be 1000 times higher... For instance, children maltreated with vaccinations suffer 30 times more often from hay fever those

not vaccinated, according to a study of the Jackson-State-University. The tetanus vaccination increases the risk of diseases by at least 100,000%, i.e. 1000fold (<https://www.amanita.at/en/interesting/articles/war-cycles-the-swine-flue-genocide>).

3. A similar calculation can be made for the true costs of microwave WMDs (cell phone, Wi-Fi...): instead of costs of EUR or USD 20-50 per month the true costs might be 100 times higher, i.e. thousands of euros or dollars per month. In the case of electrosmog the external effects are strongest, e.g. death rays at the workplace, from neighbors, in public open space etc., which at the moment (!) don't produce any direct \*individual\* costs at all.
4. Heat insulation might cost EUR or USD 20,000 (at first), but in reality the costs may be 10 times as much (EUR or USD 20,000). The reason is that the eco/ green madness not only causes dilapidations (building stock ruined), but the mold often created by heat insulation often leads to terrible health effects. Germany has one of the strictest insulation laws, so it has already become #1 worldwide for the occurrence of asthma of children. Without doubt, the green insulation fascists want to kill more people than *Hitler, Stalin & Mao* combined. The Egypt pyramids are at least 12,000 years old (the official numbers are of course wrong), while today's 'eco' mold stalls are ripe for a teardown or complete renovation after 1/400 or 1/200 of that time. This nonsense is called 'science & technological progress', when in reality it is the opposite. Never before in history has humanity been so degenerated & it won't be so degenerated again in the future.

Bottom line: the cause for follow-up costs is secretly created, with the consequences seen in the following decades & by future generations. The pent up inflation increases costs especially because of these factors: loss of earnings, extremely rising number of accidents & diseases (physical & mental), infertility, an intelligence crash & lower labor productivity, poor political decisions, and an increase in martial activity... Lower labor productivity caused by electrosmog is also the main reason why unemployment in Eunuchistan is not much higher yet: more & more working hours & thus more & more employees are required to complete the same tasks. Brains work less efficiently due to the 24/7 exposure to microwave death rays. True unemployment is about 20% in the US ([Link](#)) & somewhat less in Europe, however it would be much higher with working brains.

Unfortunately, today's mainstream economics has nothing but whimsical ideas & don't grasp at all what it is going on in the economy. Today's materialistic economics teachings are limited to the lower 3 dimensions, although future costs already exist in the higher dimensions, especially in the 4<sup>th</sup> dimension (time). Those with an open 3<sup>rd</sup> eye access the higher dimensions & the higher their LoC (level of consciousness), the higher their dimensional access. The 0.12% chosen ones (Gospel of Thomas #79) calibrate at least in their mid-500s on the scale of *David Hawkins, M.D., Ph.D.* & thus have access to the 8<sup>th</sup> dimension (soul). The level of implicit Amanita inflation in Pussystan (=Eunuchistan = socialistic block EUSApAn) according to a muscle test calibration:

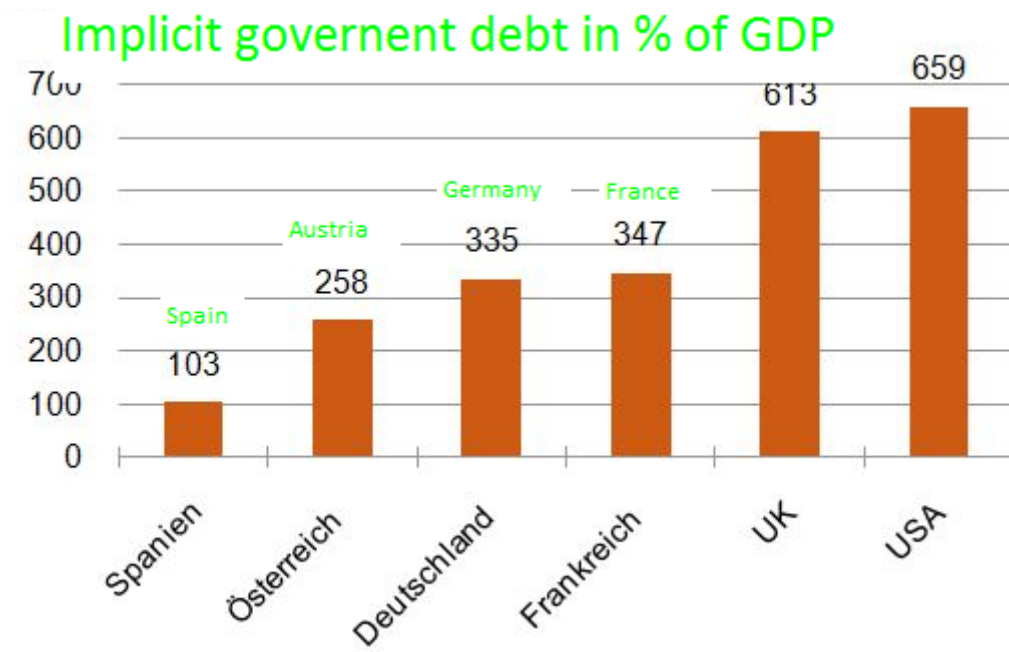

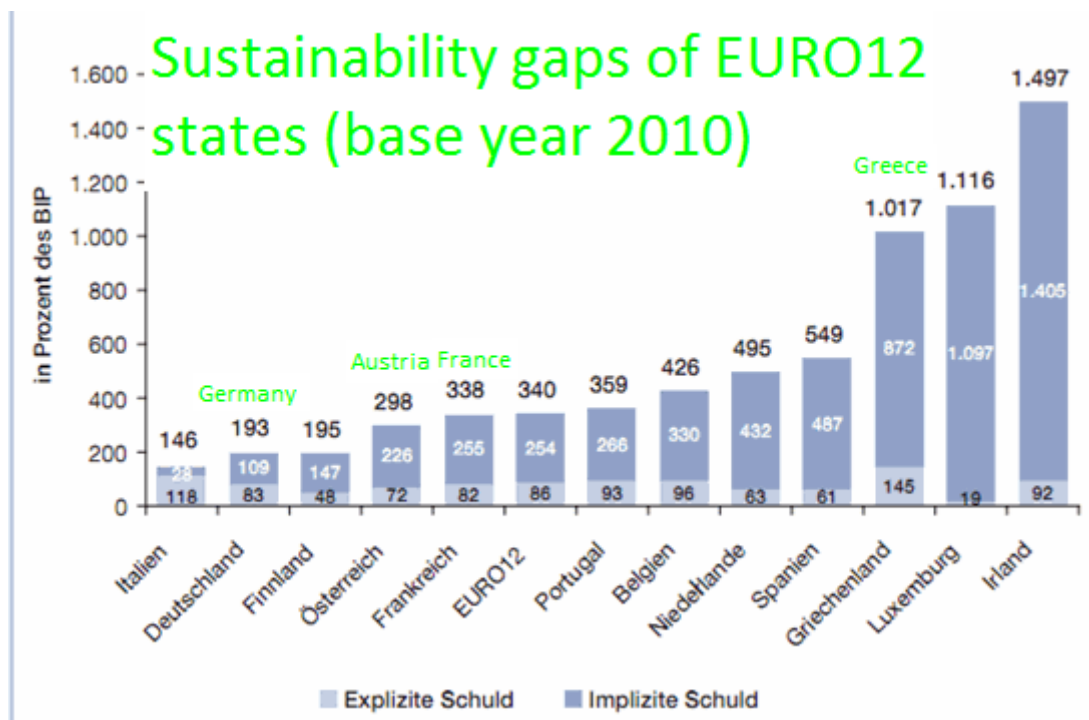

- 1970: 15%
- 2000: 50%
- 2010: 120%
- 2018: 300%

Sure one could also \*calculate\* the implicit Amanita inflation, but this would require huge effort of (dozens of) thousands of hours. Such a calculation is not less serious than today's hedonic price inflation indexing, which is nothing but estimates. Into the early 20<sup>th</sup> century there was almost no gap between explicit & implicit inflation. So I defined the concept of Amanita inflation in the early 2000s, in order to include built-up inflation.

From an accounting point of view this includes inflation provisions. Provisions are made when something hasn't manifested on a 3D level but exists already on the higher dimensions, mainly as information (6<sup>th</sup> dimension). It is 100% irrational that this information is not included in today's inflation calculations.

The same principle applies to explicit & implicit government debt. According to calculations of the German economist Prof. *Bernd Raffelhüschen* \*implicit\* government debt is much higher than

\*explicit\* debt, explicit debt ([Link1](#), [Link2](#)). E.g. in 2010 the implicit government debt of Luxemburg was almost 60 times (!!!) greater than the explicit, likely this ratio has widened by 2018. In 2010 Ireland had an implicit debt of 1500% of the official GDP. If we take into consideration that official global GDP numbers are overstated by 50-200%, then we could arrive at a level of 3000-5000%. Unfortunately, the 2018 implicit numbers haven't been calculated, but we can be confident that it has been going through the roof in recent years. So, implicit government debt may be 50-100 times higher than the (true) GDP... According to this logic the Amanita inflation is implicit, while mainstream inflation is explicit.

We find the usual discrimination by the state terrorists: the private sector has to keep book records at audit quality. In contrast, the state itself does things it would label fraud when the state slaves would do the same. The government accounting is cameralistics = cash accounting (without provisions), which the state only allows for microenterprises. So \*all\* official government finances are never anything else but fraud.

## Solution of the energy crisis

*And for this cause God shall send them strong delusion, that they should believe a lie. That they all might be damned who believed not the truth, but had pleasure in unrighteousness. (2.*

*Thessalonians 2, 11-12)*

There are 5 different levels of energy production on the continuum Antichrist->Christ:

1. nuclear energy
2. fossil energy
3. renewable energy: wind, solar...
4. free energy: magnet motor, cold fusion according to *Dr. Andrea Rossi*, plasma technology of *Mehran Tavakoli Keshe*, transmutation according to *Prof. Boris Bolotov* from the Ukraine, Airbus patent EP3047488B1
5. purely spiritual energy

So even free energy is nothing but a transition during the early stage of the 1,000 year Golden age. As a matter of fact you don't need the technical stuff of the first 4 stages listed above... I have been researching free energy (#4) since 2001 & in 2006 I was successful at applying purely spiritual methods to run a computer over hours. At this time I owned a very old laptop where the battery always worked for exactly half an hour. A couple of times I could extend this battery's service life by hours with the aid of an image affixed. On these occasions the battery load dropped quickly to ~7% capacity, only to remain there for hours. However, each time the laptop suddenly turned off after hours of use, making it a very fascinating experiment, but not practical at all. The hard disk & operating system are affected by these power outages, where reliability & stability are needed.

I got a major input by meeting Wolfgang Wiedergut (5/13/1961-9/30/08) in the summer of 2003 (image below). He was an excellent free energy researcher & \*the\* best illuminati decoder. There is so much I owe him. He died on 9/30/2008, 11 days before 10/11/2008 (=1111), the day the Austrian politician *Jörg Haider* was killed. *Haider* had opposed the lodge & thus was sentenced to death by a Freemasonic ostracism.

I took the photo on the right-hand side in the pilgrimage church Maria Ettenberg near the Untersberg Mountain at the Austrian-German border. In the coming 1,000 years the Untersberg Mountain will have a similar role as the Temple Mount over the past 5,000 years. This picture has the highest vibration of all images I am aware of: LoC=995. So Christ's vibration (LoC=1000) is manifested almost perfectly. The only other known artwork calibrating higher than 590 is from

*Rembrandt* ([Link](#)). This is no coincidence at all, as *Rembrandt* was born with the sun near heaven's gate 108° (18° Cancer) – which is also the degree of free (celestial) energy. *David Hawkins* (6/3/1927-9/19/2012) was also born with 2-3 planets near heaven's gate (his moon is questionable). When I printed this picture out & put it into the refrigerator I had to reduce the intensity of the cooling from level 4 to level 3. Then I fine-tuned the fridge a little & could reduce the level to 2.5 to achieve the same cooling temperature. This would roughly halve power consumption. So the energy sector could save many billions at virtually no cost at all.

Several companies offer subtle energy-saving solutions. Unfortunately, all these projects are attacked by the Queen of the hell realms. So you find a lot of dubious inventors, such as the Iranian nuclear physicist *Mehran Tavakoli Keshe* with his plasma technology. Around Easter 2014 *Keshe* declared himself to be the Messiah, which he recanted soon thereafter: a short-term Messiah! At the time of the declaration *Keshe* was a little bit over 666 months old (55.5 years), as a code what kind of 'Messiah' he is... Still, the *Keshe* technology plays a key role in the explanation why Iran will be militarily so successful in the 2020s, according to *Nostradamus* & others. In the end Iran will harvest karma & 5/6 of Iran will be destroyed ([Link](#)).

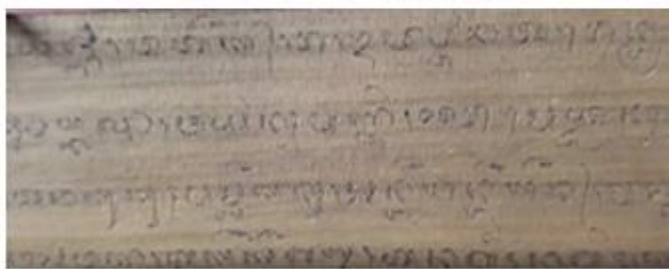

In 2023 the Kali Yuga ends, and that's why from 2023 partial energy conservation can be transformed into a 100% one. However, first a consciousness shift of humanity is necessary, which requires the biggest energy crisis in history. The picture shown above can certainly attribute to the ongoing consciousness evolution. However, be careful, because working with this image could trigger a deep personal soul cleansing. Please let me know about any saving of energy you may encounter. Many thanks in advance!

## Prophecies #7: Palm Leaf Readings

*Destiny doesn't take anything which it hasn't granted first. (Seneca)*

In the free newsletter from January 2018 I described an ongoing research project based on palm leaves for individuals, in an effort to find commonalities for the coming 30 years. In previous times you had to travel to India for a reading of your palm leaf (unless you happen to live in India), but for some time remote readings over the internet have been offered, e.g. by [palmleaves.eu](http://palmleaves.eu). I thank all who had their palm leaves read & shared some excerpts from their readings with me. So far the analysis of 3 dozen people has revealed an amazing alignment regarding world events, which I will discuss in this article.

### Background: vakku siddhi (perfect prophecy quality) LoC>700

*The willing, destiny guides them; the unwilling, destiny drags them. (Seneca)*

Prophecy is one of the 9 gifts of the Holy Spirit ([Link](#)), their presence has a high correlation with the level of consciousness. So I distinguish 3 different types of prophecy (primary, secondary & tertiary) sources according to their quality:

1. Tertiary sources are so weak, worded in general terms & so questionable that it is best to ignore them altogether. The crowd is always fascinated by garbage & thus focuses on tertiary sources.
2. Secondary sources are useful in principle, even though their reliability & accuracy leave a lot to be desired & timing is not possible at all. More often than not the statements are distorted heavily by the philosophical-religious background of the junior prophets & statements are usually only valid for some years, in a few cases for a few decades.  
I distinguish 2 groups of junior prophets: the good ones (LoC>570) & the bad ones (LoC=545-570). Understand that the average increase per incarnation is only 5 LoC points, i.e. usually there are many incarnations between these 2 sub-groups. Especially the bad junior prophets such as *Irlmaier* the German Nostradamus are often manipulated by dark forces. When I saw a picture of *Irlmaier* for the first time I realized immediately that he was & still is pushed by a very powerful satanic hierarchy. The manipulation by the Yin side means that prophets are first fed with a lot of true information to make them popular, but eventually they are abused to spread disinformation. That's why secondary sources are often amazingly accurate in details, but wrong in their essence.
3. Only primary sources represent the prophetic gold standard, as they allow us confidence in future statements with absolute reliability & accuracy without any time limits, i.e. even over centuries or millennia. These senior prophets must have a level of consciousness of at least LoC>700 on the consciousness scale of *David Hawkins*, M.D., Ph.D., to allow vakku siddhi (perfect prophecy quality), which requires full access to the Akashic records. Such a depth of divine realization is rare. In the past 5000 years you had entire centuries without a single person

on the entire planet calibrating this high. So far I have only counted the Holy Bible & Nostradamus as primary sources. It is almost never understood that 25-35% of the content of the Holy Bible is prophecy: mostly already fulfilled & the rest is fulfilled in the coming 20-30 years. Note that just in the Old Testament there were about 300 signs for the first coming of the *Messiah* (fulfilled) & even about 500 for the second coming (4% of the verses of the New Testament), as researched by *Dr. David Reagan* ([Link](#)). Recent research has proven that palm leaves must be treated as the third primary source. It astonishes that normally in a palm leaf the life so far is 100% perfectly described in 5-20 details (names, dates...). That's why the perfect description of the past is the primary quality feature of a palm leaf reading. Without that it's most likely only a reading in Vedic astrology. As one of my US reader from the area of the red mountain wrote to me:

*It was an amazing experience and it's almost hard to believe that someone could write about me at this level of detail and accuracy thousands of years ago.*

Some of the study subjects have read 2-3 palm leaves, which usually showed an amazing consistency. A palm leaf reading means you connect with the extraordinary vibration of the authors (Maharishis), which has got very little to do with a usual consulting. Often it will have a major impact on one's life & this appears to be a main reason why these leaves were written. So these readings contribute to creating the Golden Age. Now in the end times there are a lot more people with an extra-ordinary LoC>700, although still not more than a few dozens. By the mid-21<sup>st</sup> century vakku siddhi will be an often normal phenomenon according to *Nostradamus* & the Holy Bible (Acts 2:17):

*In the last days, God says, I will pour out my Spirit on all people. Your sons and daughters will prophesy, your young men will see visions, your old men will dream dreams. Even on my servants, both men and women, I will pour out my Spirit in those days, and they will prophesy.*

This global move is prepared by 3 waves of indigo, crystal & rainbow humans, albeit the theories spread on this topic only have modest truth content. Above, the quantitative aspect of this phenomenon is overestimated by far: only 1-2% of a cohort fall in one of these 3 categories. Most children are simply highly 'damaged' by electrosmog, vaccinations & other factors. The first wave of indigos was fathered from the Sirian experiment 8/7/1972, for almost 2 years after the biggest proton flux in history the free human will was deactivated ([Link](#)).

This article also helps you in interpreting your personal palm leaf, whether it has been read in the past or will be read in the future. A part of the palm leaves analyzed was already interpreted a long time ago (years-decades), so their outcome can be assessed today. Many readings can be found in the literature & in forums & I am in contact with a few researchers in the field. As an example see these videos for a nadi reading: [Link](#), [Link](#), [Link](#), [Link](#), [Link](#), [Link](#), [Link](#), [Link](#), [Link](#). The exact procedure is a little different for every palm leaf library (up to 200), however the basic framework is always the same. Without exception, the authors were Rishis \*before\* the beginning of the dark age in the year 3102 B.C. (death of Krishna).

Note: in the first years after his walk-in in the early 1970s Drunvalo Melchizedek was another primary source, but he no longer plays a role today. He & his wife got the most detailed future descriptions from angels, e.g. on day X at time Y you get a letter from Z saying ABC. The couple observed that the prophecies were 100% accurate, but eventually life got boring, leading to their souls no longer able to make the desired experience, so they stopped it. Later *Drunvalo* was lured into a trap by the dark side (especially by *Toth = Hermes Trismegistos*), so that *Drunvalo* is no longer regarded as a primary source. The order of the *Melchizedek* is already mentioned in the Holy Bible: *Melchizedek* the King of *Salem* blessed *Abraham*. *Toth* this old rascal has made a huge mess, as detailed by *Lisa Renee* ([Link](#)).

**Conclusions: 4 timelines (2023/24, 2032-34, 2041/42, 2047-49)**

*In the beginning the universe was created. This had made many very angry and has been widely regarded as a bad move. (Douglas Adams)*

The most amazing fact is that some palm leaves event contain content regarding global events. E.g. according to a message from *Isolde Heller-Bayer* a palm leaf reading in 1997 said that a female member of the English royal family would soon die. A few days later *Diana* was murdered by the illuminati, at this time \*the\* most popular woman on the planet... The Canadian palm leaf expert *Dr. Qiu Moayad* told me that theoretically one could also read palm leaves for countries.

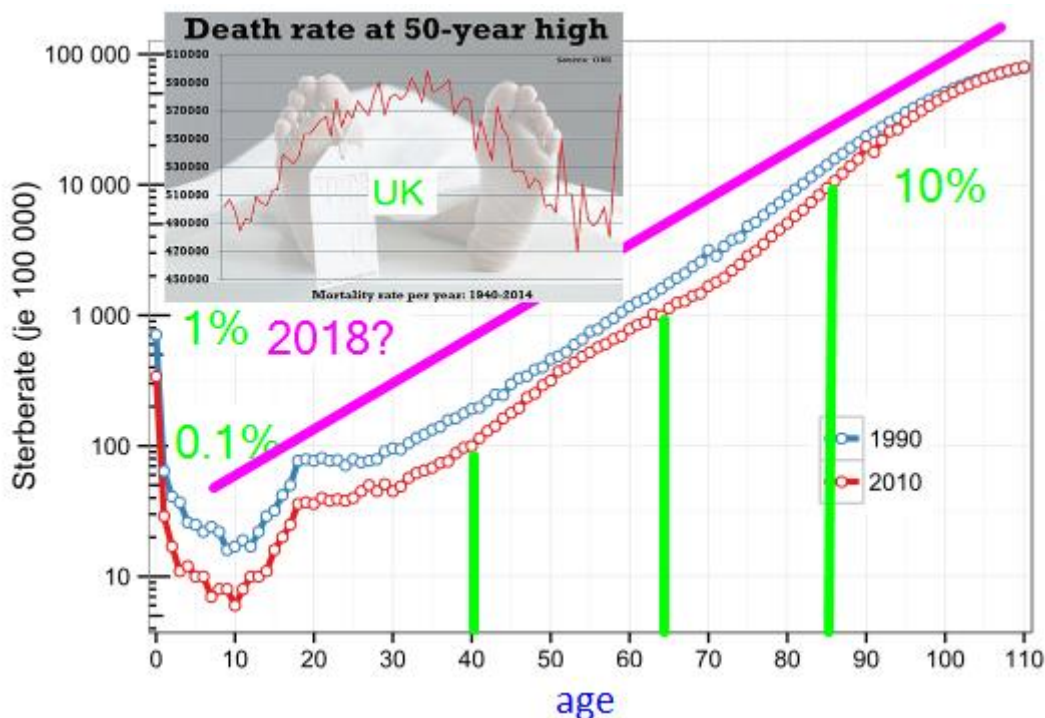

Most of the palm leaves analyzed are from Germany & Austria, the rest are from other countries like Switzerland, Sweden, some US states, Australia, South Africa & Peru. So unfortunately, due to the number of assessed palm leaves, it is only safe to draw general conclusions for the nations Germany & Austria. The conclusions for the rest of the world are questionable.

In a palm leaf you usually find a discussion of the owner of the palm leaf & his core family: parents, siblings, partner, children, and sometimes also other very close persons. The age designations are always given in the Indian system of life years, i.e. the age 33 always means the 33<sup>rd</sup> life year, even if not explicitly stated. Further comprehensive answers are found in the FAQ of [palmleaves.eu](http://palmleaves.eu) ([Link](#)).

Partly even the year of death of these people is stated, but not always. Deaths are the most concrete in the analysis. So I could find 4 major timelines, where almost all give leave their body for this incarnation (rest ~10%):

1. primary timeline 2032-35 (death number 20fold increase): More than a third of the deaths mentioned in the palm leaves are in the early/ mid-2030s. Adjusted by the age & the time duration this means a death rate 20 times higher than expected by chance. For a long time the mid-2030s have been mentioned as \*the\* timeline of our lifetime (approaching the 3 dark days), which is fully confirmed by this independent analysis. The second meaning of the timeline of the mid-2030s is that some will reach vakku siddhi (perfect prophecy quality), which requires a level of consciousness LoC>700.
2. 3 secondary timelines 2023/24, 2041/42 & 2047-49 (5-10fold increased death numbers): Roughly 15-20% of deaths occur in each of the 3 secondary timeline periods 2023/24, 2041/42 & 2047/48, which is a 5-10fold increase versus chance expectation. The first & last timeline have been on my list for a long time due to a great many calculations, only 2041/42 is now.

For age adjustment calculations I have used the death rates for Germany as stated by Wikipedia for 2010 ([Link](#)). According to this source the odds of death for young adults are <0.1% per year. Around the age of 40 the 0.1% level is surpassed, around 65 the level of 1% p.a., finally at the age of 85% the level 10% p.a. Needless to say, these numbers are no longer correct, as since 2013 the death numbers have been going through the roof. However, we don't have any exact numbers (massacred by statistics terrorists) but only estimates: so I still use the official numbers. After all, at least the official British numbers admitted that one single year (2014) was enough to erase the entire (!) 40-year decline of death numbers since the 1940s. This was almost the only time the cat was let out of the bag. Since 2015 the numbers around the globe have been counterfeited come hell or high water. The pink link suggests a rough estimate for the 2018 death rates in Pussystan (=Eunuchistan).

The first of these 4 timelines in 5-6 years (2023/24) only has a weak effect on the death rate, mainly caused by the widespread civil wars in Central Europe around 2023/24, and to a lesser degree also by electrosmog & earth changes. One palm leaf even made a very specific statement regarding Germany: “Riots, but no war & for 2-3 years economic problems with neighboring countries.” I interpret ‘riots’ as a synonym for ‘civil war’. For the mid-2020s several palm leaves contain travel warnings, partly even indicating danger of life. This makes sense, because travelling in civil war areas is very dangerous. During my third palm leaf reading in October 2017 I specifically asked for these non-individual statements, but this leaf contained nothing whatsoever.

By and large, my assumption has been fully confirmed that Eastern Europe & the Southeastern Central Europe are the locations on the planet with the highest survival rates until the mid-21<sup>st</sup> century. That’s why for decades the Queen of the hell realms has been spreading negative messages for Eastern Europe through junior or even wannabe prophets, e.g. through *Irlmaier*. The high survival rate around the Untersberg Mountain makes sense if you consider the warning of the boss (Matthew 21:43):

*Therefore I tell you, the kingdom of God will be taken away from you [Jews] and given to a people [Germans] producing its fruits.*

According to an archive of the Marcion society the boss said this to German soldiers. He was referring to the German people as the next alpha people. As pastor *Cioccolanti* put it ([Link](#)): “*The next move of God is always opposed by people who were used by the last move of God. Due to this predestined role of the German people a large number of them \*must\* survive, especially if living in the region near the Untersberg Mountain as the successor of the Temple Mount. In contrast, a number of peoples & nations will be wiped out entirely.*”

## Classification of these 4 time linens: song of the birch tree & more

*A mouth they have, and they speak not, Eyes they have, and they see not.* (Psalm 115:5)

As mentioned 3 of these 4 timelines align well with the existing Amanita calls, only 2041/42 is a different case. The movie *Crimson Rivers II: Angels of the Apocalypse* gives the date of the apocalypse as 730,730 days after the crucifixion, which is 2000 years 8.2 months. In this movie the crucifixion date is stated as 4/7/0030, which would point to 12/6/2030 ([Link](#)). However, in reality the crucifixion was sometime in the years 31-34, according to *Isaac Newton* on 4/3/0033: when you add 730,730 days you arrive on the date 12/2/2033. In the 1970s *Peter Lemesurier* concluded from

his research of the more than 12,000 year old pyramids that the sign of the Messiah would be visible in the sky on 10/31/2034. Either way everything aligns towards 2033-35, which is the #1 timeline according to palm leaves.

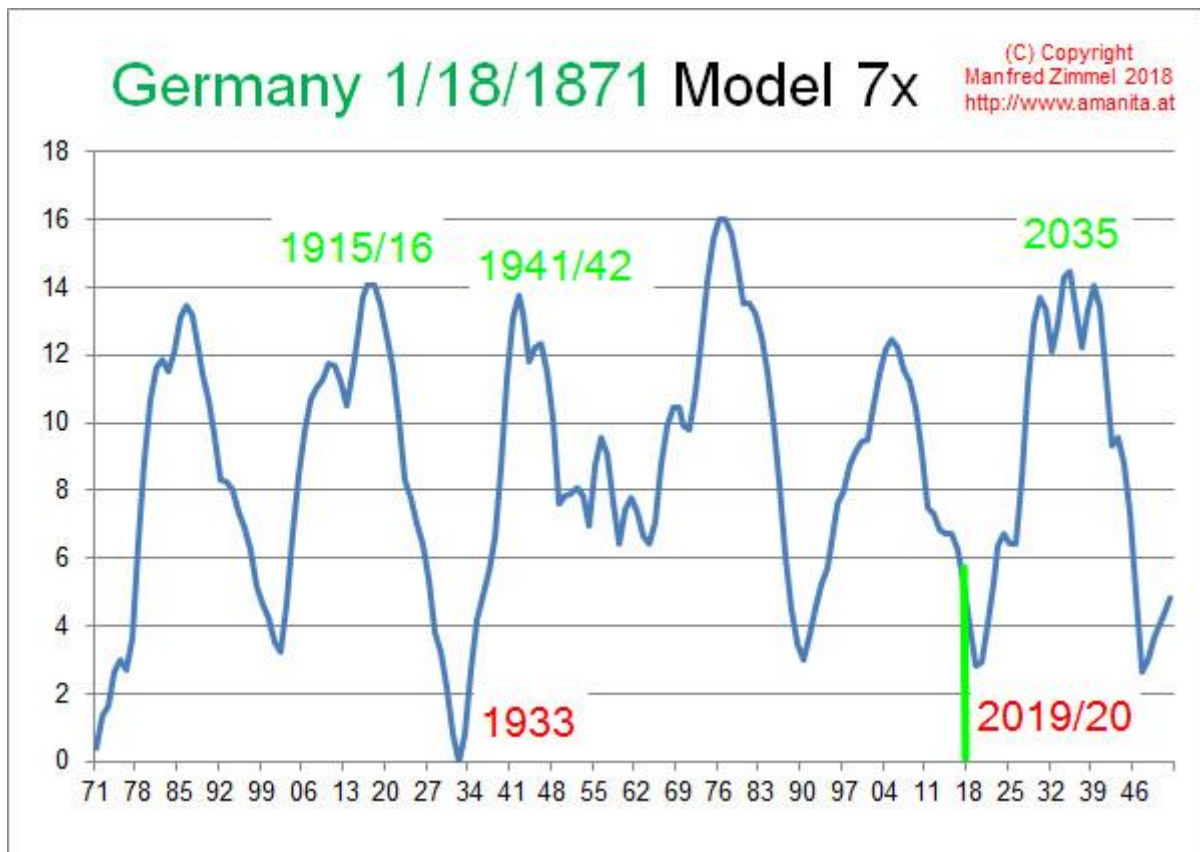

The song of the birch tree ([Link](#)) is also focused on Germany & Austria (like the palm leaves analyzed), which contains only one *\*explicit\** timeline. However, partly the verse numbers are *\*implicit\** codes in the *Nostradamus* style ([Link](#)):

*Great Emperor Karl, consecrated in Rome,  
remain the cornerstone of the German time,  
hundred-sixty seven year time limit,  
Germany touched to the quick.*

So what do you make of the numbers 160 & 7 mentioned? Obviously you can apply the 4 basic arithmetic operations: addition, subtraction, multiplication & division. If you use these calculations you arrive at a wonderful quadruple code, with the mutual cross-confirmation confirming the decoding is correct:

1. 2037/38 addition: On 1/18/1871 *Wilhelm* was crowned the first emperor in modern times, 160+7 years later is 1/18/2038. The 7 is by far the most important number in the Holy Bible, the end of the 7+7+7 years of Tribulation is due in fall 2037. 2038 is also the end of the 18 cannibalistic years according to the Mongolian prophecy by *Ferdinand Ossendowski*. Likely 2038 is the next crowning. Emperor *Karl I of Austria* was 31 when he was crowned in 1916, Emperor *Henry the Lucky* will also be 31.
2. 2023/24 subtraction:  $1/18/1871+160-7$  is 2023/24, which is when Germany will be severely wounded (civil wars). According to *Nostradamus'* letter to *King Henry, Israhell* falls after 73 years 7 months (founded 5/14/1948), i.e. from December 2021 on. So late 2021/ early 2022 will bring a cascade of Middle East events, which will spoil the whole planet.
3. 2015 division:  $160/7=22.86$ . If we subtract 22.9 years from 1/18/2038 we arrive at 2015: IS invasion. Without doubt, the national rape of Germany & Austria in 2015 was the most terrible event for these countries since WW2.
4. 1920 multiplication:  $160 \times 7 = 1120$ . According to 'sagas', *Emperor Charles the Great* is still in the Untersberg Mountain, which is possible because of the time slowdown by a factor of 200-300. What a 'coincidence' that 34 of the 45 US presidents are descendants of *Charlemagne*, according to *Prof. Dr. Walter Veith* ([Link](#)). Untersberg Mountain time phenomena have been observed numerous times since the rule of Roman Empire. *Charlemagne* was crowned in the year 800 in Rome,  $800+1120 = 1920$ . The window 1920 +/- 1 year marked the end of the German & Austrian empires. His name twin, *Karl I*, was the last Austrian emperor until late 1918. He was born on 8/17/1887, near the Untersberg key date August 15 & with the triple 888 Messiah code.

At present the Amanita composite model for the German empire (1/18/1871) attacks the lowest level since 1933 & as in 1933 fascism (=maximum Yin) rules: the leftists, greens & globalists want to wipe out the German people. As in 1933, the German people thirst for an Austrian Führer. From 2019/20 the model is heading up for about 15 years, which means that the fascist agenda won't last for too long. Major highs in the composite model nearly always mean victory & triumph, which in the case of countries is true on the economic, political & military level. The high in the late 19<sup>th</sup> century was the 'gründerzeit' when Germany became *\*the\** economic superpower. And the highs of 1915/16 & 1941/42 coincided with the military highs during both world wars. Something similar will happen in the mid-2030s, when the German-French *Emperor Henry* finally defeats the necrophiles.

Germany (=eagle=Apostle *John*) is the German Yang, Austria (=wolf/ dog) is the German Yin. Now in the end times the Yin is in the lead, and that's why the model for Austria (5/15/55 at 10:31 UT) already had the low of the first half of the 21<sup>st</sup> century in 2014/15. Now it is up for a quarter of a century into a high in the late 2030s. During the high of the 1970s Austria played a key role in the Middle East under 'sun king' *Kreisky* & made up for the economic delay, with the unemployment rate dropping to the all-time low (1%). In the 1980s Austria was economically & politically down because of *Waldheim* & the glycol wine scandal, with the unemployment rate tripling. The 1989 low coincided with the fall of the Eastern bloc, when Austria awoke from a deep slumber. Finally, the last low was in 2014/15: in 2016 the victory of presidential candidate *Norbert Hofer* in the first election was the beginning of the rebellion against the tyranny of the leftists & the Freemasonic lodge.

2047/48 (the last of the 4 timelines) is also a low in the composite model for Germany & Austria. The same year is mentioned by *Nostradamus*, the combination of the verses 9-83 & 10-67 points to the afternoon/ early evening of 5/6/2047 for a massive earthquake & 'hail' (meteorites), which will trigger a minor population dying wave. The year 2047 also plays a role according to *Peter Kubina* from Perchtoldsdorf near Vienna, Austria, who has found \*the\* Nostradamus king's key. In Andreas Rill's military letters we read:

*47 & 48 should be the wild years. [...] In the year 48 the divine chastisement ends & the people will be like the lambs & as satisfied as never before. [...] In the year 49 the ascension begins. There are no longer dreams of a victory & the countries are extinct.*

This call was more than a century into the future, of course the writer *Andreas Rill* didn't expect that these events would be so far away. During WW1 he interpreted these years as his close future (i.e. 1948). However, 1947-49 doesn't fit at all, God's chastisement & the lambs mentioned are a reference to the Last Judgment & the following Golden Age. Also, the WW2 & the following famine years didn't 'extinguish' the population, but only reduced it by some percentage points.

### Fine analysis: limits & problems

*Then the disciples came and asked him, 'Why do you speak to them in parables?' He answered, 'To you it has been given to know the secrets of the kingdom of heaven, but to them it has not been given. For to those who have, more will be given, and they will have an abundance; but from those who have nothing, even what they have will be taken away. The reason I speak to them in parables is that "seeing they do not perceive, and hearing they do not listen, nor do they understand." With them indeed is fulfilled the prophecy of Isaiah that says: "You will indeed listen, but never understand, and you will indeed look, but never perceive. For this people's heart has grown dull, and their ears are hard of hearing, and they have shut their eyes; so that they might not look with their eyes, and listen with their ears, and understand with their heart and turn, and I would heal them. „But blessed are your eyes, for they see, and your ears, for they hear. Truly I tell you, many prophets and righteous people longed to see what you see, but did not see it, and to hear what you hear, but did not hear it. (Matthew 13, 10-17)*

Although the palm leaves usually describe the past until the day of the reading with maximum perfection it doesn't mean that the same accuracy & reliability can be expected for the future. Potential problems:

1. palm leaf library & nadi readers: There are at least 7 main Rishis (*Brighu, Agasthiya* [Link](#) & 5 others) who wrote palm leaves 5000+ years ago, in addition to a number of other, unknown authors. Apparently [palmleaves.eu](http://palmleaves.eu) is only connected with good libraries, and so far all of the feedback has been positive. A large number of palm leaf libraries in India & the surrounding countries exists (200? but partly inactive), with differences on various levels including basics & formalities. E.g. a friend of mine made an appointment with an Indian library months in advance, but when he showed up he still wouldn't get a reading (typical Indian chaos). Thank God the main purpose of his travel was not the palm leaf reading but that his girl-friend was Indian.
2. palm leaf: Some people have had a mixed experience. My 2010 reading in Bangalore was also disappointing, as it wasn't more than a normal astrological reading. However, amazingly, the rest of my tour group got very precise readings in the same library. Another problem might be the wrong palm leaf, which I experienced in Kanchipuram in 2010. My on the spot reading gave a perfect description of my past, but only the first chapter/ kadam (as in the 12 astrological houses) was read. From this first reading 8.5 years ago almost everything has manifested. One could have had read some or all of the other 11 chapters/ houses against an additional fee. This took a lot longer than expected & this subsequent reading neither aligned with the first reading nor with my life. Apparently, the wrong palm leaf was used.  
There are major differences of palm leaves even within the same library: style (formulation), quality, quantity, age... The palm leaves have to be re-written every few centuries at least because they fall apart. In the last 20<sup>th</sup> century *Annett Friedrich* had her palm leaf read & she arrived with the intention of taking her palm leaf home & to analyze it (language, C14 age analysis). Normally you are not allowed to take your palm leaf with you, but the palm leaf told the Nadi reader that he should hand the leaf out to her, as she would need it for her analyses... The C14 analysis arrived at the conclusion that the leaf was indeed written before her birth.
3. translation errors: Palm leaves are a major field for language analyses. The Southern Indian leaves are in old Tamil, the Northern Indian in Sanskrit. The Indian English is very difficult for non-Indians, also because of the special Vedic vocabulary used. But of course, this difficulty also works the other way round: the Nadi reader had a hard time pronouncing the long & difficult first name of my mother. Vedic astrology always plays a role in the background to define a semantic structure ([Link](#)) & provide a common language of authors & readers, and partly hand analysis is also used. Often a thumb print has to be submitted (as a scan in the case of internet readings – men right, women left) to find the correct palm leaf.
4. lacking information, no details:  
Unfortunately, it means little if anything when specific (negative) events are \*not\* included – it

doesn't mean it won't happen. A most obvious example: just because your death isn't mentioned it doesn't mean you will live forever (in this body)! ☺ Moreover, a palm leaf contains so much information that it can never be fully read in one reading. The letters on the palm leaves are tiny. One can & should ask questions, as this opportunity is normally offered. Indians living close to the libraries have been consulting their leaf repeatedly ahead of major life decisions, asking further questions. According to one source there are 7+ palm leaves for everyone ([Link](#)). Experience tells us that different palm leaves from different libraries complement each other.

Example for lacking information: for somebody a new partnership was predicted for 2 specified life years & 5 years later childbirth, without mentioning any new relationship in-between. Clearly the most obvious interpretation was that this partnership would be blessed with children after 5 years. However, this was not stated explicitly & didn't happen, so the beginning of the 2<sup>nd</sup> partnership was omitted.

So there are deliberately omissions & gaps in the palm leaves, so that the divine play lila can unfold, out of the position of not knowing, ignorance & disbelief. Not knowing is the standard case, sometimes also ignorance & disbelief as in the case of *Hitler*, when his consultant *Karl-Ernst Krafft* warned him of the Eastern campaign because of some *Nostradamus* verses. Ignorance was also present during the betrayal of *Jesus Christ*, the Pharisee certainly knew the old prophecy that the Messiah would be betrayed for 30 silverlings & yet they gave *Judas* 30 silverlings & not 20 or 40.

Apart from these cases of ignorance the wording \*must\* be so nebulous and/ or incomplete that the negative can \*not\* be avoided – otherwise it would be a logical contradiction. Nevertheless, the palm leaves can & should co-create destiny to some degree, but this has limitations, otherwise the prophets would load this karma on themselves. This is part of the divine play leela, so \*all\* 3 primary sources (Holy Bible, Nostradamus & palm leaves) \*must\* be encoded. The boss put it that way (Matthew 7, 6):

*Do not give dogs what is holy; do not throw your pearls before swine. If you do, they may trample them under their feet, and then turn and tear you to pieces.*

So Jesus Christ mentioned dogs & pigs as negative symbols, which makes sense: the pig is the Buddhist symbol for ignorance & the dog is the symbol for evil. Nostradamus used this excommunication statement:

*Let those who read this verse consider it profoundly,  
let the profane and the ignorant herd keep away  
and far away all astrologers, idiots and barbarians,  
may he who does otherwise be subject to the sacred rite.*

5. too positive information, diffuser: In general, forecasts tend to have a too positive bias, which is really extreme in the case of the palm leaves. So you should take negative statements 100% seriously, while all positive statements are dubious & should be treated as a 'best case scenario'.
6. false information (opposition): The biggest disappointment in my analyses was that partly false information is given on purpose. Most suspicious are negative wordings, e.g. in life year X you will \*not\* have health problems. In particular I have found that the death year of the owner of the palm leaf or the core family is sometimes given 1 or 10 years too late. Example: one person had more than one palm leaf read, the one mentioned a life expectancy of 75 years, the other 85 years – but also stopped the life description in the 75<sup>th</sup> life year. So the key is to see at which age the life description ends, not the 'official' death year mentioned.
7. ambiguous information & codes: „*If King Croesus crosses the Halys River, a great empire will be destroyed.*” King Croesus allegedly got this answer when he consulted the oracle priestess of Delphi. So in 550 B.C. he attacked Persian King *Cyrus II* – and destroyed his own, great empire. The same double-barreled statements are often found in palm leaves, so they can contain a subtle code with deeper layers as is the case with the *Holy Bible & Nostradamus*. As a rule of thumb the hidden code is the negative shadow of a statement that looks positive at first sight. Examples:  
\* Somebody interpreted major investments in 2027-30 as a positive sign for a stable life. However, just the opposite could be true, i.e. that prior major destruction requires these investments.

- \* The phrasing „*your company will do better again*“ likely is a code for a preceding period of company weakness.
- \* Somebody (the brother of the palm leaf owner) is supposed to build a house in the early 2030s at the age of ~60: but who voluntarily builds a house aged 60+? Very few, with a more likely solution being a preceding destruction of the house.
- \* A highly successful self-employed person will be paid in ‘donations’ in the 2<sup>nd</sup> half of the 2020s. In the current system it would be absurd for this person to work without properly invoicing his clients. Probably this is a code for a systemic crash by the mid-2020s at the latest, accompanied by a widespread impoverishment. A similar statement says that in 2023/24 somebody donates money for charities. Apparently this does not refer to 20 euro or dollars but to really big sums – because the state is no longer able (or willing?) to help? Similarly, somebody with a fat pension plan will be financially supported by his daughter in the 2030s. This is a sign that neither government nor private pension plans will ‘survive’.
- \* It is more than suspicious when child birth is predicted for the early 2020s, yet the child is never mentioned again. More likely than not this means it will become a victim of the suggested high child mortality.
- \* In one case the purchase of a car is mentioned. This is by itself a rather unimportant life event, so it appears to be a code, but what for? Possibly it implies the destruction of the old car by rioting or earth changes.
- \* During my palm leaf reading in March 2010 in Kanchipuram „changes in the company, modernization“ were predicted for my life year July 2013 through July 2014. I immediately understood this only can mean a relaunch of my website. However, just in the year before the palm leaf reading there was a complete relaunch (in 2009) & I actually planned the next one a lot later than 2014 – as late as possible due to the huge expenditure of time. However, during the 2<sup>nd</sup> half of 2013 the existing hosting with their self-created CMS caused my site to function less & less and then became almost non-functional. So I was \*forced\* to relaunch the site as predicted. Interestingly, this relaunch statement also contained a code, as a quick relaunch only needs 1-2 months & thus would only be a non-significant life event. However, this relaunch became crucial because *Murphy’s law* prevailed: whatever could go wrong did to wrong. During this life I have only experienced 4 professional horror projects & this relaunch was one of the four.
- \* A recurring formulation is a „*happy life through spiritual activities*“ or „*spiritual growth*“: this is a code for difficult times, when the outer life doesn’t offer much good.
- \* Somebody who hasn’t had contact with his son for many years (although he desires it) was told he would again have contact in the late 2020s/ early 2030s. A familiar situation so muddled often requires an external trigger (e.g. a super-crisis) for reconciliation. A similar crisis code is “*you will have good friends*“: in times of a crisis the social network is crucial.
- \* The wording „*You will see many foreign countries*“ sounds good on the surface & might mean a world trip during normal times, however in the 2020s & 2030s escape/ emigration is the more likely outcome.
- \* It sounds more than fishy when more than one family member dies in the same year. Statistically (P=90-95%) this means a common \*external\* cause. In some percentage points the broken-hearth syndrome may be an explanation in the case of long-term partners.

Bottom line: the palm leaves are tailored perfectly to the school of life, so their content & codes depend on the receiver, situation, time quality... The most encoded palm leaf I have seen was from a religious studies scholar, where his palm leaf was apparently part of his academic studies in this field. Simpler minds get simpler palm leaves...

If this description has made you curious then I suggest a remote reading through [palmleaves.eu](http://palmleaves.eu). There are other offerors, too, thereof 2 in Canada (one is Greentara Vera [Link](#)), but I can’t tell much about them. If you have a palm reading please send me a message of your key life events. Of course, all of your data is treated with absolute discretion & confidentiality.
